

## Excellence in Training, Consulting and Auditing

**Wheretofromhere?** offers services for any RTO in the VET sector. We develop people, design and refine systems and ensure positive business results regardless of the size or complexity of your organisation.

Our philosophy is simply to assist companies with identifying efficient ways to continually improve every aspect of their business. We achieve this through education and consulting services to empower staff to think efficiently, act efficiently and seek improvement in every facet of the business operations.

- We are an RTO (31584) offering training and assessment services in TAE40110, Certificate IV in Training and Assessment.
- We are very experienced lead auditors for the AQTF, ISO9000 and GTO standards.
- We are highly proficient AQTF and business consultants who understand quality management systems in business.
- State and Federal government approved auditor (AQTF, GTO, Q-Ride).
- Quality Consultant

Being compliant with the AQTF is relatively straight forward, however using the AQTF framework to grow your business and stay ahead of your competitors requires a systems approach.

The VET sector is a complex industry and we are constantly asked by trainers, RTO administrators and people wanting to become RTOs, how to navigate the systems that make up the VET sector. Many of our clients are endeavouring to become RTOs, some are trainers and assessors who simply want good professional development while others are RTO staff who use our expert audit services to determine the compliance of their systems. More often RTOs ask us to audit them to find improvements, efficiencies and to take the complexity away.
